

Fall Conference Overview

ASNT

During the first week of this month, a good number of your quality professional peers will flock to sunny San Diego. But they won't just be trying to squeeze in a couple more days of beach time before we're all ushered into the cold days of mid-Fall. In addition to the lure of the Southern Californian city's perpetual 80 degree temperatures, San Diego will also provide the location for the ASNT Fall Conference and Quality Testing Show Nov. 4-8.

What follows is a list of exhibitors (as of press time) followed by each company's booth number and Web address, if available.

For much more information about nondestructive testing, the American Society for Nondestructive Testing and/or other ASNT events, visit www.asnt.org.

Filled with keynote addresses, industry tours, sessions and short courses, this year's ASNT show represents a busy few days for those attending. If you'll be at the 2002 ASNT Fall Conference and Quality Testing Show, don't forget to stop by the *Quality Digest* booth (534).

EPOCH 4B
A Simple Solution for Complex Inspections

Eighteen years ago we introduced the world's first portable digital flaw detector. Realizing it would revolutionize ultrasonic flaw detection, we appropriately named it the EPOCH 2002.

Fast forward to the year 2002... generations of flaw detectors later, we're introducing the EPOCH 4B. Compact and lightweight, this new unit offers many more measurement features and software options than its legendary predecessor. And at a lower cost. That's called progress. For more information call 781-899-2719.

GE Panametrics
We bring good things to life.
