

# Quality Sourcebook

No matter the organizational dilemma or need—from compliance to quality standards to maintaining calibration records—you can be sure that there's at least one software solution designed to alleviate it. Employing quality software is probably the most commonly used and most fail-safe method to implement and maintain quality control. Not only are computer programs helpful for those seeking registration to quality standards, they're also crucial in manufacturing environments, where maintaining instrument integrity is essential.

The following section will help organizations that depend on software applications and services for their calibration records and ISO standards processes. The three directories in this section are Calibration Services, Calibration Software and ISO Standards Software. Because there is such a wide variety of statistical process control software, we've given that subject its own section. Check behind the SPC tab for more information.

These directories are not meant to endorse or exclude any particular organization. Rather, they should be used as the starting point in the data-gathering process. Readers are encouraged to contact the companies directly for more information and to ask for—and check—references.

## Software Guide

Calibration Services Directory .....Page 83

*This directory of calibration service providers includes the company name, phone and fax numbers, and Web address.*

Calibration Software Directory .....Page 87

*This is a directory of companies offering calibration software. Listed are the company name, address, phone and fax numbers, and Web address.*

ISO Standards Software Directory ..... Page 90

*This directory of ISO standards software providers includes the company name, address, phone and fax numbers, and Web address.*

*Brief company descriptions, if provided, can be found on our Web site at [www.qualitydigest.com/directories](http://www.qualitydigest.com/directories).*

## Glossary

**CAD**—computer-aided design

**CAM**—computer-aided manufacturing

**CD-ROM**—compact disk that functions as read-only memory

**Client/server**—describes the relationship between a powerful central computer (server) and individual PCs (clients) that request resources from the server; clients can share files and access data stored on the server

**CoSQ**—cost of software quality; an approach to software quality that entails outlining the economic benefits of delivering good-quality software

**IEEE**—Institute of Electrical and Electronics Engineers

**Intranet**—privately maintained computer network accessed only by authorized persons

**Real time**—relating to computer systems that update information at the same rate as they receive data, enabling them to direct or control a process such as an automatic pilot

The information contained in Quality Digest directories, plus some additional information, is available online at [www.qualitydigest.com/directories](http://www.qualitydigest.com/directories).

**Pass your audits easily!**

**ProGAGE™ ISO v6** calibration management software gives you an easy, flexible way to assure ISO compliance at low cost.

- Complies with ISO-9000 and QS-9000
- Tracks gages, schedules calibrations, and maintains complete calibration history
- Tracks, schedules, and performs gage R&R studies
- Fully customizable to meet your needs
- Report Module lets you design, edit, and export reports in several formats
- Supports check fixtures and gage kits
- Gage Master screen lets you record and review gage data and history from one handy location
- Tracks calibration procedures, work orders, and certificates of calibration
- Runs on stand-alone PCs, networks, and MS SQL Server

QD

# IBS

## A Broad Range of Quality System Software

### Corporate Overview

IBS offers enterprisewide Web-based compliance and production quality software solutions addressing the key elements of compliance for any standard or regulation, in any industry, streamlining the compliance process and reducing time, complexity and cost.

### Compliance systems

CompliantPro is a Web-based, document control system enabling organizations to create and manage quality documents to meet unique organizational requirements.

### QSi system

- *Quality management.* Addresses the elements of ISO 9001:2000 and, if used

in its entirety, provides a paper-free quality system.

- *Automotive management.* Specifically addresses the requirements of QS-9000 and ISO/TS 16949.

- *Environmental management.* Meets the requirements of ISO 14001, containing 12 environmental management modules such as aspects and impacts, objectives and targets, MSDS and hazardous materials, and emergency preparedness.

- *Health and safety.* Meets the requirements for BSI OHSAS 18001, as well as governmental health and safety requirements.

- *FDA document control 21 CFR Part 11.* Optional draft documents database provides an audit trail that automatically date and time stamps the life cycle of every document.

### Production quality system

Allows users to perform inspections, record data, pass or fail inspections, print reports, and analyze costs and defects. Provides users with a complete system to monitor, track and calibrate all gages.

IBS is ISO 9001:2000-registered.
