SHADOWS HAVE THEIR PLACE. JUST NOT IN THE LAB.

The KESTREL[®] from Vision Engineering combines quality control, laboratory accuracy, repeatability and optical excellence in one low investment system.

Precision is paramount in the lab. And now you can have the "real-image" accuracy of the new Kestrel[®] instead of measuring shadows. What's more, Kestrel features the latest Dynascope[®] technology for fatigue-free operator viewing, a space saving footprint, rugged construction, and a very affordable price. Put shadowgraph devices in their place. Call (800) 644-7264 for a free Kestrel demo and information on our full line of stereo and non-contact measurement systems.

THE LONGER YOU LOOK THE BETTER WE LOOK.

Vision Engineering Inc.

Fatigue-Free Inspection and Measurement Systems

Corporate Overview

With more than 40 years experience in inspection systems for manufacturing industries worldwide, Vision Engineering has a reputation for excellence.

Vision Engineering's patented Dynascope technology is the distinctive feature in its eyepieceless expanded-pupil stereo microscopes and two- and three-axis non-contact measurement systems, which combine the high resolution of an eyepiece microscope with the ergonomic advantages of optical comparators.

Hawk and Kestrel noncontact measuring systems provide high-accuracy,

repeatable measurement of complex manufactured components of all materials. Configurations vary from two-axis manual systems to fully automated, edge-detecting three-axis measuring platforms.

Lynx, Alpha and Mantis stereo microscopes produce large, high-resolution images. Lynx has become the most desirable stereo-zoom microscope on the market. Alpha provides high-quality optics to 160x. Mantis bridges the gap between bench magnifiers and microscopes.

Data options include Metronics QC-200 or QC-5000. The QC-200 digital readout supports industries that call for precise

measurement of 2-D and 3-D parts. The QC-5000 PC-based software offers extra flexibility with a straightforward interface and advanced data handling capabilities.
