

2008 Flowchart/Process Simulation Software Directory

Welcome to *Quality Digest's* 2008 Flowchart/Process Simulation Software Directory. The companies in this buyers guide create or distribute software whose primary function is to aid in analyzing a company's existing designs or operations to create important process-improvements and cost-savings opportunities. Functions include the flowchart, as in a schematic representation of a process used to help the user visualize the content or to find the flaws in the process; and process simulation, such as viewing a computer simulation that mimics a company's operations to determine optimal conditions, bottlenecks, or sensitivity to process changes.

Included in this buyers guide are company names, addresses, telephone and fax numbers, and web addresses. Further information that has been provided to us, such as descriptions of the software modules/suites, is available online at www.qualitydigest.com/content/buyers-guides.

As with all of our directories, this guide is intended as a starting point to help readers choose the right solution for their needs. *Quality Digest* hasn't evaluated, nor do we endorse, any of the products or services listed in this directory.
