

2009 Quality Sourcebook

Software

When it comes to quality software solutions, it often seems as though there's something for everyone. Standards compliance, process simulation, and flowcharting are just some of the solutions that exist for the intrepid explorer of higher quality. Software isn't just being used in the boardroom, either. Increasingly, computerized systems are finding their way down to the shop floor, where real-time software programs can help ensure that processes remain controlled.

This section contains the ISO Standards Software buyers guide and the Flowcharting/Process Simulation buyers guide. These guides offer a plethora of solutions for your organization.

ISO Standards Software Buyers Guide Page 41

This directory of ISO standards software providers includes the company name, address, phone and fax numbers, and web address.

Because there is such a wide variety of statistical process control software, we've given that subject its own section. Check behind the SPC Software tab for more information on providers of these solutions.

These directories are not meant to endorse or exclude a particular organization. Rather, they should be used as the starting point in the data-gathering process. Readers are encouraged to contact the companies directly for more information and to ask for—and check—references. Further information, including company descriptions (if provided to us) can be found on our web site at www.qualitydigest.com/content/buyers-guides.

Flowcharting/Process Simulation Software Buyers Guide ..Page 46

This directory of flowcharting/process simulation software providers includes company name, phone and fax numbers, and web address.

That's why it's the World's #1 installed calibration management software solution!

Free trial available!

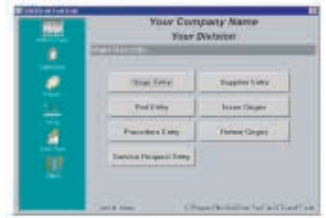

GAGetrak® FastTrak

If you're still using standard spreadsheets or index cards to track your company's calibration records, this is the product for you!

GAGetrak FastTrak is the speedy solution to fit any company's budget!

Only \$799 per license!

GAGetrak® SQL Server

SQL Server version of GAGetrak improves speed and efficiency of large databases while providing greater data security.

Best for installations where scalability, security and interoperability are needed!

GAGetrak® BEACON

Lightweight service-based system improves efficiency and reliability of calibration email notices. Configure to send notices only to specific technicians and departments (used in conjunction with SQL server).

CyberSensor™

CyberSensor is a temperature-humidity monitor for your calibration environment, that works in combination with GAGetrak v6.5 and links to your computer via a USB port.

Calibration Label Kit®

Print durable laminated calibration labels directly from GAGetrak with this compact, convenient printer.

Labels come in a variety of colors and sizes from 1/4 to 1-1/2 inches.

GAGetrak® PDA Software

Perform calibrations in the field and then transfer the data back to your GAGetrak database.

The convenient, paperless solution for your calibration needs!

GAGetrak® Training, Implementation & Consulting Services

As a solutions provider, CyberMetrics provides customers with a wide-array of services to complement its product offerings. Choose from on-site or regional classroom training or opt for specific consultation services.

HQMS
Quality Management

We need this!
Call 1-800-ISO-9000

It takes more than great products and services to make a company successful. Companies must have the resources and business processes to help them grow and improve. HQMS provides the tools you need to sustain growth and continuously improve your business processes.

HQMS is a web-based quality management system. The system integrates your quality functions with daily business management operations to give you full control over your quality concerns and regulations.

HQMS is your portal to business and quality solutions: share information, achieve compliance, standardize processes, initiate improvement, maintain consistency and ensure accountability.

QD

Quality Management Software

Are you using Excel and Word, or a standalone QMS, to manage your company's quality and continuous improvement activity, with duplicate data entry?

uniPoint bridges a multitude of quality standards such as ISO 9001, ISO/TS 16949, and AS9100 and encompasses the principles of Lean Manufacturing. Our Document Control module is FDA 21 CFR Part 11 compliant, and we ensure that you can measure the cost and frequency of quality events.

uniPoint continuous improvement modules integrate you existing data, and automate your journey toward excellence.

New Features in Version 11.1:

- Multi-User Process Control
- Record Templates
- Inspection Module
