

# 2006 Calibration Services Directory

Welcome to *Quality Digest's* 2006 Calibration Services Directory. Ensuring the accuracy of your measurement equipment is a key factor in achieving a consistent level of quality, and calibration service providers help you do just that.

Following are more than 170 companies that provide services designed to assist you with all your calibration needs. Included are company names, addresses, telephone and fax numbers, and Web addresses. Please note that only those

companies responding to our request for information are listed. This directory, complete with company and calibration services descriptions (if provided to us), can also be found on our Web site at [www.qualitydigest.com/directories](http://www.qualitydigest.com/directories).

*Quality Digest* hasn't evaluated, nor do we endorse, any offerings from these companies. We suggest that you contact these organizations directly for specifics on their services.

We wish you luck in your search for the right calibration service provider.

**NEW BOOK  
ON LEAN**

## Rebirth of American Industry: A Study of Lean Management

by William H. Waddell  
and Norman Bodek

### Read this book to:

- Promote productivity
- Understand and reinterpret conventionally accepted financial-control systems
- Rediscover the lean practices of early manufacturing pioneers
- Create a lean culture within your organization
- Analyze and adopt the management style of currently successful lean practitioners such as Toyota

### Testimonials

"*Rebirth of American Industry* puts American management on the carpet, showing how modern accounting drives American companies to nonlean measures. It clearly demonstrates why American manufactures continue to come up short when compared to their lean competitors. If unheeded, it could be the epitaph of a once-great manufacturing powerhouse."

—**Bill Kluck, president, The Northwest Lean Networks**

"This excellent book will make some enemies. It is outspoken, hard-hitting and correct. Companies that try to implement lean tools in production without dismantling and reinventing their management and accounting methods are doomed to failure."

—**Brian H. Maskell, president, BMA Inc.**
